The Next Stage in Usability

This entry model of the ARIETTA series invites easy operation from beginners through experts. Its outstandingly easy-to-view 21.5 inch monitor and intuitive, user-friendly operability will bring you to the “Next Stage”.

Carefree
Workflow

Clear
Imaging

Flexible Monitor Arm

The monitor arm can be moved freely to give you greater flexibility when performing multiple styles of exams.

21.5 inch Widescreen Monitor

The high contrast LCD monitor with a wide field of view displays images with high sensitivity and resolution, reducing patient-dependent image variability.

Palm Rest

Easy-to-use Touch Screen Panel

The touch screen panel is mounted at a comfortable and convenient angle. The screen's layout is customizable by clinical application, allowing for intuitive operation.

Adjustable Panel Height/Rotation

It is possible to adjust the height and rotation of the operating console to best suit the operator and examination to be performed.

Gel Warmer*

The gel warmer is conveniently inclined for easy access.

4 Transducer Connector Ports

Allows you to switch transducers quickly and seamlessly, when examinations require the use of multiple transducers.

Battery*

Battery operation enables the system to be moved to a new location without powering it down, so that operation can be resumed immediately.

Clean
Application

Simplified Operating Console

Minimalized layout includes only the necessary controls. Reduces time searching for the right button, offering a more pleasant operating experience.

User-friendly Interface

Select an examination area from the illustration to start operation.

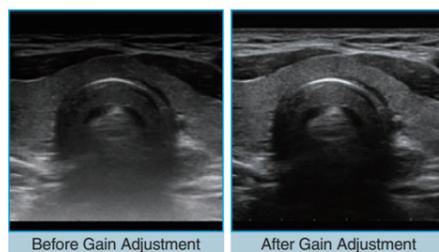

Scan Using a Previous Setting

Choose a patient's previously-acquired image and the system will adjust to the same exam settings; invaluable for follow-up comparisons.

Silky Image Processing (SIP)

This adaptive image filter has further evolved to reduce speckles and boost edge enhancement, generating clearer images for easier interpretation.

Auto Optimizer

Images can be adjusted with a single keystroke: B-mode gain, baseline position and velocity range of the Doppler waveform are all optimized.
